I'm a recent graduate from CCCCC in Vancouver (Cornerstone International Community College of Canada) and looking for an entry-level position as a Front-end Developer.

I'm originally from Belo Horizonte, Brazil and have been living in Vancouver since September 2019. I have an Undergraduate degree in Business from Troy University in Alabama and I also used to play professional tennis. Fun fact: I attended the Australian Open in 2009 and practiced with two of the greatest tennis players in the world – Rafael Nadal & Roger Federer. Now I'm ready to enter the world of web development, and I'm loving every minute of it.

You may be asking yourself: what does sports have in common with web development? On top of playing pro, I also worked in New York and Connecticut as a Pro Manager & Tennis Coach. I built a solid relationship with clients and taught myself how to speak English (currently I am trilingual, as I also speak Portuguese and Spanish). This role required me to handle multiple deadlines, be self-motivated and a team-player. Also, it was when I first became interested in web development/ design. I had to create content to promote events in the clubs. The platform used for that is Canva. I believe all of these are necessary for a career in technology.

In terms of technical experience, I am passionate about ReactJS and I find building components to be fascinating. Once the component is built, it can be used everywhere in the application or be reused in another project, as an installed package, simplifying further maintenance. I created a group project with React at CCCCC (Cornerstone International Community College of Canada) and built a website for a client who wanted to promote/sell his book on Parkinson's Disease, his feedback about our group was very positive. I'm also trained in WordPress, PHP, Custom Advanced Field, SEO and more. See attached resume for my portfolio.

Thank you for your time and consideration. I hope to bring my energy, drive, and past experiences to the tech industry. Please do not hesitate to contact me for any more information.

Best regards,  
Gabriel Dias
